To our 466 LEAD graduates,

CONGRATULATIONS!

Thank you for all your contributions in building this club into what it is today, you will always be part of this club's story!

All the best for your journey ahead!

Our President's Vision:

As president of TPLA, my vision would be a space where everyone feels empowered to grow as leaders and collaborate on projects that truly make a difference. My goal is for TPLA to be a place where we can all learn from each other, work together and create change regardless of who we are.

I'm excited about the future of TPLA and how we can continue to challenge ourselves to think outside the box and take meaningful steps forward. My hope is that we all support each other, grow together, and create a lasting impact as individuals or as a community!

Ng Shi Ying Shannen
AY25/26 TPLA President
Diploma in Law & Management

***Class** of 2025 VaLEADictorian*
Pan Pacific Award for All-Round Excellence
Quartermaster and Managing Editor of Engineering Studies Club
CCA Merit Award (Leadership) & Community Service Excellence Award
TP Scholarship (Engineering)

The Temasek LEAD Programme has given me opportunity to try things and participate in events and programmes. These events developed me as a person, and gave me valuable experiences. It allowed me to connect with many others, outside of my course, from other polytechnics and institutions.

My most memorable experience in Temasek LEAD was the Global Engagement Programme (GEP) I took to the UK. The trip was enriching in its experience, and we had the opportunity to interact with foreign university and local students. It was eye opening to see the various possibilities in terms of our future pathways. Furthermore, I had the unexpected blessing of making several firm friends across the trip, among both batchmates, and seniors. Without them and their varying perspectives, I don't think the trip would have been as enlightening as it was, or as enjoyable.

My main advice would be similar to my response to the earlier question, being that since you are already part of Temasek LEAD, you should definitely make the most of it. Ask questions and join events, especially optional electives. You never know when a random or unexpected event happens to pique your interest or be right up that alley. But if you don't make that first step, you will never know. Temasek LEAD presents you with a range of opportunities for you to experience different programmes and events. Even if you're just going to watch or listen to something, it might be your first step into something bigger.

You are the main- CHARACTER IN YOUR OWN STORY.

Teo Jia Ning Phoebe
Diploma in Marketing (Merit)
AY24/25 TPLA President
Start Something Silver Course Medal
OKTSY LLP Subject Prize

The Temasek LEAD programme allowed me to explore various experiences, both overseas and local, and helped me find out more about myself and my peers. It was also where I had met many lifelong friends that have supported me through my hardships and have had the pleasure of growing as people with.

My most memorable experience was when I participated in the GEP UK Trip in 2024, where Temasek LEAD had brought a group of students to London, Liverpool, and Bristol in the UK. I remember being able to fulfil my bucket list dream of visiting the British Museum. The museum gave me perspective of how beautiful history could be, and inspired me to want to pursue the humanities at University.

Everything will work out in the end. Trust the process and yourself as the end might not look the way you envision it to be.

Mohamed Fardeen Ikram Bin Azlan
Diploma in Mechatronics(Merit)
ENGenius programme
AY24/25 Vice-President of Engineering Studies Club
Community Service Excellence Award (Individual)

The Temasek LEAD Programme has set the foundation to build up my leadership skills, and also exposed to other important sections of personal self-development, such as cultivating essential values like respect, compassion and commitment to excellence.

My most memorable experience in Temasek LEAD was the overseas GEP Trip to Finland! I had an adventure of a lifetime with like-minded leaders from different diplomas and schools, honed my leadership skills, and understood how Finland and Singapore differ in their political system, culture and many more.

When you have the will to do something, do it! Persistence in our actions is the best way to improve ourselves. All you need to do is to take the first step forward, and soon, you will definitely get the hang of it and excel beyond what you could've imagined!
